Ranks No. 712 on the 2023 Inc. 5000 Among America's Fastest-Growing Private Companies

(Based on 3-Year Revenue Growth)

NEW YORK, August 15, 2023 – Inc. revealed today that BYTHON ranks No. 712 on the 2023 Inc. 5000 — its annual list of the fastest-growing private companies in America. The prestigious ranking provides a data-driven look at the most successful companies within the economy's most dynamic segment — its independent, entrepreneurial businesses. Many noteworthy brands gained their first national exposure as honorees on the Inc. 5000.

"Thank you to our awesome customers, team, supporters and friends over this past year who helped us achieve the Inc. 5000. Bython is always on it helping our customers develop and execute campaigns their way with full transparency," says Chris Leger, CEO of Bython.

The Inc. 5000 class of 2023 represents companies that have driven rapid revenue

growth while navigating inflationary pressure, the rising costs of capital, and seemingly intractable hiring challenges.

Among this year's top 500 companies, the average median three-year revenue growth rate ticked up to an astonishing 2,238 percent. In all, this year's Inc. 5000 companies have added 1,187,266 jobs to the economy over the past three years.

For complete results of the Inc. 5000, including company profiles and an interactive database that can be sorted by industry, location, and other criteria, go to www.inc.com/inc5000.

"Running a business has only gotten harder since the end of the pandemic," says Inc. editor-in-chief, Scott Omelianuk. *"To make the Inc. 5000 — with the fast growth that requires — is truly an accomplishment. Inc. is thrilled to honor the companies that are building our future."*

To qualify, companies must have been founded and generating revenue by March 31, 2019. They must be U.S.-based, privately held, for-profit, and independent—not subsidiaries or divisions of other companies—as of December 31, 2022.

Bython's unique positioning has fueled its rapid growth. They own their own data, resources, and technology, which sets them apart in an industry where these attributes are not common. The increased emphasis on data, transparency, quality, and ownership has highlighted Bython's legitimacy compared to many other companies in the demand generation space.
